# Executive Summary (1)

The State of Georgia's Annual Workforce Report, which follows below, serves as a critical tool for identifying data-driven trends to enhance the management of the state's human resources. It is a product of the Human Resources Administration (HRA) division of the Georgia Department of Administrative Services (DOAS) and relies on data from TeamWorks Human Capital Management (HCM). The data presented in this report covers Fiscal Year (FY) 2023, spanning from July 1, 2022, to June 30, 2023.

In FY 2023, several notable workforce improvements were observed, not only in comparison to the preceding fiscal year but also in comparison to several prior years. This report will address both positive and negative outcomes within the state government's workforce. Additionally, it will highlight the results of an enterprise-level retention study conducted from March – June 2023 and actions taken to address various concerns. One key finding is that work-life balance plays a crucial role in determining retention rates.

Key Insights from the FY 2023 Workforce Report include the following:

- System-wide average annual compensation increased 7.7% compared to FY 2022.
- System-wide median annual compensation increased 5.5% compared to FY 2022.
- System-wide number of active, full-time, non-temporary employees increased by 3.5% compared to FY 2022.
- System-wide turnover rate for full-time, non-temporary employees was down 4.3% (17% relative decrease), and the related voluntary turnover rate for the same population decreased by 4.2%, both compared to FY 2022.

The 3.5% increase in system-wide full-time, non-temporary employees represents only the second such increase in the past 15 years. This encouraging trend has been clear since April 2022, when the number of hiring events began consistently to exceed the total number of separations nearly every month. The timing of this inflection point coincided directly with the implementation of \$5,000 salary increases recommended by Governor Kemp and approved by the Georgia General Assembly. The increases in hiring, the decreases in separations, and the larger employee population all contributed to the decrease in the turnover rate by FY 2023.

While the system-wide voluntary turnover rate decreased, it's worth noting that the voluntary turnover rate for Generation Z (born after 1998) in the Executive Branch increased by 2% over the previous fiscal year. In fact, Generation Z is experiencing the highest voluntary turnover rate among all generations. The reasons behind this trend warrant further investigation. Conversely, voluntary turnover among millennials (1981-1997) in the Executive Branch decreased by an impressive 8% from FY 2022, marking the most significant decrease since FY 2016. Voluntary turnover rates for both Generation X (born 1965-1980) and Baby Boomers (1946-1964) in the Executive Branch decreased slightly.

From a generational perspective, the state's workforce is continuing to rebalance toward younger cohorts. Millennials and Generation Z employees now constitute 43% of the Executive Branch's core workforce. Moreover, these two generations accounted for 67% of the Executive Branch core workforce hiring events in FY 2023. This represents a growing trend over the past several years.

# Executive Summary (2)

Looking ahead, 27.5% of executive branch full-time employees will become eligible for early retirement within the next five (5) years, while 22.8% will be eligible for full retirement in the same timeframe. Thus, it is imperative that effective knowledge transfer programs are in place to capture institutional knowledge.

Despite the improvements in staffing, challenges persist. Addressing these concerns, DOAS HRA has maintained a productive partnership with various educational institutions through the Workforce Strategies Initiative (WSI). This initiative, launched in January 2022, aims to enhance talent acquisition and retention strategies across the state government enterprise. Moreover, DOAS HRA established a new internal unit to focus on recruitment and retention. This unit will play a vital role in fostering partnerships between state agencies, state educational institutions, and military organizations to create new talent pipelines and enhance existing ones.

In June 2023, DOAS HRA conducted a one-day in-person Workforce Summit and Solutions Expo at the Georgia Public Safety Training Center in Forsyth. This event brought together education practitioners, agency leaders, state HR professionals, and other stakeholders to share resources and insights to address recruitment and retention issues. Approximately 165 individuals representing over 40 state agencies participated in the event.

In addition, during March – June 2023, DOAS HRA conducted an enterprise-level retention study in partnership with Deloitte Consulting. The purpose of the study was to explore the drivers of retention and attrition across state agencies. It included an employee sentiment survey and 13 focus groups. 12,433 employees (25% response rate) from 62 agencies responded to the study's survey, and about 100 participated in the focus groups. Some notable survey findings include:

## **Reasons for Attrition**

- Inadequate compensation
- Limited career opportunities
- Negative work-life balance

## **Reasons for Re-employment**

- Positive work-life balance
- Performing work that matches interests and strengths
- State benefits

## **Reasons for Retention**

- Positive work-life balance
- Performing work that matches interests and strengths
- State benefits

# Executive Summary (3)

Based on the data and findings of the study, 14 specific recommendations were proposed for the state of Georgia, categorized into three areas:

## **Attracting Employees:**

- Design employer brand strategy built around the mission
- Expand talent sourcing to include non-traditional populations
- Review and communicate a transparent compensation philosophy
- Redefine job architecture and requirements and expand apprenticeship/internship programs
- Modernize technical infrastructure to support current and future work demands

## **Engaging Employees:**

- Standardize and expand hybrid and remote work opportunities
- Enhance change management and communication efforts
- Conduct regular employee engagement activities
- Develop accessible reporting mechanisms and escalation processes

## **Developing Employees:**

- Design pre-management and management training programs
- Establish employee training and continuing education programs
- Formalize role progression and expand rotational programs
- Define statewide performance management processes to encourage ongoing feedback
- Establish a succession planning framework

DOAS HRA continues to share the findings of the retention study and recommendations with the state human resource community and key stakeholders. The additional feedback will help to identify the most pressing issues and help to prioritize them based on the impact and feasibility of implementation.

Moreover, the state of Georgia has initiated the Next Generation Enterprise Resource Planning (ERP) Project (NextGen) in collaboration with the State Accounting Office, the Georgia Department of Administrative Services, and the Georgia Technology Authority. This multi-year project will transform various aspects of state operations, including human resources, financials, and procurement, that will support future recruitment and retention efforts.

Additionally, DOAS HRA continues to support proactive recruitment strategies by state agencies, including participation in job fairs, hosting hiring events and running social media recruitment campaigns.

In summary, the State of Georgia is actively and successfully addressing recruitment and retention challenges within its workforce through data-driven insights, strategic partnerships, and innovative initiatives.

# Focus Areas (1)

## Staffing

In a noteworthy development, the number of systemwide active, full-time, non-temporary employees has increased by 3.5%, marking the first such increase in 15 years. Furthermore, there has been a significant uptick in the number of employment applicants, with a 20% increase from FY 2022.

The state continues to rebalance toward younger cohorts. In FY 2023, Millennials constituted the most hires at 44.6% of Executive Branch hires. Generation Z, the youngest generation in the state's workforce, represented 21.9% of FY 2023 Executive Branch hires. As expected, Generation Z's representation has grown steadily as they enter the workforce in greater numbers. In FY 2018, they represented just over 2% of Executive Branch hires.

In a bid to provide additional recruitment support to agencies, DOAS HRA initiated a new advertising campaign to brand the state as an employer of choice. Engaging a marketing firm for the first time, DOAS HRA invested in advertising across various channels, including radio, digital billboards, and digital pop-up ads. This campaign led to a 23% increase in employment applications during the duration of the campaign. Thus, this underscored the effectiveness of enterprise-level branding in attracting greater quantities of candidates.

## HRA Recommendations

DOAS HRA is currently exploring funding enterprise-level advertising to attract larger applicant pools. This decision is based upon the successful FY 2023 branding campaign that resulted in a 23% increase in job applicants and feedback from the WSI workgroups.

Additionally, agencies should prioritize providing timely feedback to candidates, dedicate adequate staff to the recruiting function, and invest in the development of recruiters. Optimizing the recruiting process includes transitioning away from paper employment applications, creating appealing and informative job postings, and launching social media recruiting campaigns. Agencies should employ these strategies to enhance their ability to attract and hire the next generation of qualified talent.

HRA Enterprise Talent Management Services (ETMS) has already established social media campaigns that state employers can use as models for their recruiting efforts. ETMS also consults with agency HR staff to review recruiting processes and leverage existing software tools in order to reduce the time to fill vacant positions.

Candidates should be well-informed about the benefits of working in the public sector, including schedule flexibility, time off, health insurance, flexible benefits, extensive pension plans, and employee assistance programs. Such benefits make public sector work more appealing.

# Focus Areas (2)

## Turnover

The state's overall turnover rate decreased by 4.3% in FY 2023 compared to FY 2022. This represents the most significant year-over-year improvement since 2020 and only the second year of improvement since 2016. The employee engagement and retention study revealed that the top three (3) reasons for turnover are inadequate compensation, limited career opportunities, and negative work-life balance.

Notably, the most significant turnover continues to affect the state's youngest workers. Millennials (aged 25-41) and Generation Z (aged 24 and younger) are leaving state employment in significant numbers. The Executive Branch FY 2023 voluntary turnover rate was 20.3% for Millennials and 49.3% for Generation Z. Most of the voluntary turnover for these groups occurs within one (1) year or less of service with the state. It's important to note that high turnover, as explained by the Society of Human Resources Management (SHRM), can lead to service delivery challenges, decreased productivity, and reduced employee morale.

## HRA Recommendations

Equipped with results from the recent retention study and feedback from WSI workgroups and partners, the new HRA Recruitment and Retention unit will continue to share the findings of the study with key stakeholders and assist agencies in developing action plans to address the root causes of high turnover.

Agencies should maintain a focus on career development by implementing mentorship and leadership development programs. Specialized developmental opportunities for younger workers to expedite their career advancement and promotion readiness may be necessary. Additionally, supporting employees in earning professional certifications and providing additional training can help to retain the modern workforce. This is important for Millennials and Generation Z, who expect development opportunities to be part of their employment experience.

# Focus Areas (3)

## Retention

Given that retaining current employees is a cost-effective approach to meeting staffing challenges, DOAS HRA conducted an enterprise-level retention study in partnership with Deloitte Consulting. The purpose of the study was to explore the drivers of retention and attrition across state agencies. It consisted of an employee engagement survey and 13 focus groups. 12,433 employees (25% response rate) from 62 agencies responded to the study's employee engagement survey.

This study gathered feedback on various themes, including organizational culture, job satisfaction, relationships with management, development and support, leadership, and team dynamics. The study's findings indicated that the top three (3) drivers of attrition included inadequate compensation, limited career opportunities, and negative work-life balance. The study also featured 13 focus groups, which provided additional insight into the drivers of retention and attrition. Based on the data and findings, 14 specific recommendations were proposed for the state of Georgia, categorized into three (3) areas: attracting employees, engaging employees, and developing employees.

## HRA Recommendations

Findings from the study provide valuable data to guide future retention efforts. For example, data from the study supports offering hybrid work options and upskilling current employees to retain talent. Efforts should be made to develop, implement, and promote a robust career path along with a performance management program that offers clear and concise goals, frequent conversations with supervisors, individual development plans, and career mapping. Such a program is aligned with the expectations and preferences of Millennials and Generation Z.

Investment should be made in training that enhances front-line supervisors' coaching and development skills. Identifying high-potential employees and implementing management/leadership development programs for this group will contribute to employee retention. Also, as indicated by the study, more effort should be made to promote state benefits and remind employees of the additional rewards provided by the state, including health benefits, employee assistance programs, retirement contributions, and employee discount plans and opportunities.

# Focus Areas (4)

## Retirements

A substantial portion of the retirement plan-eligible Executive Branch employee population is eligible for full retirement. Seven percent may retire immediately, with an additional 2% within one (1) year. Approximately 20% of the retirement plan-eligible population may enter full retirement in less than five (5) years.

When considering early retirement, the percentage of retirement plan-eligible Executive Branch employees who may do so immediately increases to 10.8%, with 13.2% eligible after one (1) more year. Overall, the percentage of retirement plan-eligible Executive Branch employees who may retire early within the coming five (5) years is 27.5%.

Nine executive branch agencies face immediate experience drain risks, with over 30% of their population eligible for early retirement within the following two (2) years. An additional 22 executive branch agencies have workforces with 20-29% of their population eligible for early retirement within two (2) years.

## HRA Recommendations

To prepare for the departure of experienced employees, agencies should initiate succession planning and knowledge-transfer initiatives. This entails identifying critical roles affected by retirements, exploring internal talent pools to fill these roles, and creating individual development and readiness plans to train and transfer knowledge within the designated timeframe. Where internal talent is unavailable or unprepared, planning for recruiting and hiring replacements should be a priority to ensure business continuity.

In other words, we need to make current and prospective employees more aware of the significant benefits of public service in order to attract and retain a competent and content workforce.

# Programs and Scope of Services (1)

DOAS Human Resources Administration provides resources and services to assist agencies in developing a modern workforce ready to meet the challenges of now and the future.

## **Policy and Compliance**

### State Personnel Board / Policy Compliance Support

The state operates under a framework of uniform human resources policies and practices that support compliance with employment laws and regulations and promote effective talent management. The HRA Policy and Compliance team works with the State Personnel Board (SPB) to establish the majority of this framework within a series of SPB rules. The Board rules apply to those entities that fall within the definition of “department” or “agency” in O.C.G.A. § 45-20-2(6) – generally the executive branch of the state, except for the BOR and state authorities. In addition, other guidance is issued in the form of statewide policies – often jointly with partner enterprise agencies. The human resources guidelines established by the SPB rules and other statewide policies provide guidance for a variety of human resources management areas, including developing internal processes for hiring and recruiting, absence management, classification, compensation, performance management, substance abuse testing, recordkeeping, veterans’ preference, classified employee requirements, the medical and physical exam program (MAPEP), teleworking, overtime, and sexual harassment prevention. Each agency has the discretion to tailor its internal human resources policies and practices to fit its culture and other business needs, provided the provisions fall within the statewide framework.

The Policy and Compliance unit offers consultation and resources to support compliance with the SPB rules (including the SPB’s MAPEP rules), other statewide policies, and federal employment laws such as the Family and Medical Leave Act of 1993, the Americans with Disabilities Act of 1990, as amended; the Fair Labor Standards Act of 1938; and the Title VII of the Civil Rights Act of 1964 (Equal Employment Opportunity) as well as statewide initiatives including the Statewide Sexual Harassment Prevention Program and Human Trafficking Awareness. In accordance with Executive Order 01.14.19.02, the HRA Policy and Compliance unit adopted a joint statewide policy with the Office of the State Inspector General to implement the Statewide Sexual Harassment Prevention Program and developed sexual harassment prevention training for executive branch employees and managers/supervisors. Ongoing work includes collecting a report of Sexual Harassment Prevention training numbers annually and updating the training and statewide policy as necessary.

To assist in assessing and improving compliance with state and federal rules, regulations, and laws, the Policy and Compliance team completes a human resources assessment of randomly selected state entities each fiscal year as provided for in O.C.G.A. § 45-20-1(6). The selected state entities are provided best practices and individualized meetings to review assessment findings and identify areas of improvement.

### Reduction in Force

HRAs Policy and Compliance unit also review agency reduction in force plans. In accordance with SPB Rule 4, *Reduction in Force*, the Policy and Compliance unit reviews submitted plans for compliance with the rule’s requirements and provides consultation to agencies on adverse impact and other legal risks of a reduction in force. The unit then submits the plans to the Governor’s Office of Planning and Budget for a fiscal review of available funds and approval.

# Programs and Scope of Services (2)

## Substance Abuse Testing Program

The Policy and Compliance unit additionally manages the Statewide Substance Abuse Testing Program. The Substance Abuse Testing Program is governed by SPB Rule 21 and subrules 21A-H as well as the U.S. Department of Transportation Regulations for Workplace Drug and Alcohol Testing Program, the Federal Motor Carrier Safety Administration's Substance Abuse Program for Drivers of Commercial Motor Vehicles, the Federal Transit Administration's Prevention of Alcohol Misuse and Prohibited Drug Use in Transit Operations, and the United States Coast Guard Rules for the Safe Operation of Vessels and Safety Management Systems. In addition to providing compliance support, the unit manages the state's third-party administrator of substance abuse testing (currently First Hospital d/b/a First Source Solutions). In accordance with O.C.G.A. § 45-20-90, et seq. and O.C.G.A. § 45-20-100, et seq., the Policy and Compliance team works with state entities to determine the positions and groups of positions that regularly perform high-risk work where inattention to duty or errors in judgment while on duty have the potential for significant risk of harm to the employee or others. DOAS is further tasked with establishing and maintaining a list of laboratories and collection sites qualified to conduct drug tests which the Policy and Compliance unit posts monthly on the DOAS HRA website. In addition to training on substance abuse testing generally (such as training on the use of on-site drug testing collections), the Policy and Compliance unit provides training programs on its website, which help agencies with complying with U.S. Department of Transportation requirements for supervisor training on reasonable suspicion.

## Employee Complaint Resolution Procedure

Pursuant to SPB Rule 20, *Employee Complaint Resolution Procedure*, the Policy and Compliance unit collects reports on an annual basis from each executive branch entity subject to the SPB rules information reflecting the number, nature, and disposition of employee complaints filed.

## **Talent Acquisition**

### Team Georgia Careers

The Talent Acquisition unit focuses on providing tools and solutions to assist state entities in attracting, selecting, and hiring a talented workforce under the directive provided in O.C.G.A. § 45-20-1 to provide a system of personnel administration that will "attract, select, and retain the best employees based on merit." In addition to providing the Team Georgia Careers (TGC) fully automated statewide talent management/applicant tracking solution, the Talent Acquisition unit provides guidance and tools for performance management processes and practices. The TGC applicant tracking system (Taleo) provides a platform where state entities can utilize a common employment application form and integrated tools (including substance abuse testing) to screen applicants with minimum and preferred job qualifications consistent with the Statewide Job Classification System. The TGC applicant tracking system allows state recruiters and hiring managers to accomplish the entire selection process in a "touchless" manner when using it in conjunction with the TeamWorks HCM system (PeopleSoft), in which minimal data entry is required to hire a candidate. In FY20, over 82 agencies used TGC to recruit and select applicants. Agencies posted 10,791 job vacancies, 2,176,143 applicants viewed TGC, and 424,320 applied to agency job vacancy announcements. This means TGC provided an average of 40 applicants per job opening for agencies to select and hire from at no additional cost to the agency.

# Programs and Scope of Services (3)

The Talent Acquisition Support unit has also developed a university relations program to promote the state of Georgia as an employer of choice. The team has partnered with ten colleges and universities throughout the state to advertise career opportunities, participate in career-related events (industry nights, panel discussions, resume reviews, mock interviews, senior academies, etc.), and serve as brand ambassadors on campus when they are not available. The team also provides consulting services to agencies looking to build their campus presence and/or develop internship programs.

## Talent Acquisition Resources

In addition to management of the TGC platform, the Talent Acquisition unit provides the following resources to assist with the recruitment and hiring of talented candidates: Onboarding process template; exit interview process template; I-9 employment verification training; exit interview template; new employee orientation checklist; new employee announcement template; new employee greeting sample; staff biography template; veterans' preference decision tree; sample recruitment and pre-offer screening process steps; and guidelines for Team Georgia careers functions.

## Performance Management

In the area of performance development, the Talent Acquisition team provides support, guidance, and tools to state entities on the use of the ePerformance Tool and compliance with SPB Rule 14, *Performance Management*, and the State of Georgia's Core Competencies. A performance management toolkit is also provided that equips agencies with forms, templates, job aids, and e-learning materials for the performance evaluation process.

## **Compensation**

### Classification and Compensation Services

In accordance with O.C.G.A. § 45-20-1(c), it is the responsibility of the Compensation unit to establish and maintain the state's job classification and compensation structure and, in consultation with agencies, establish state-wide criteria for the implementation of associated rules and policies. The Compensation team maintains and updates the state's classification system, including the state salary plans and job descriptions grouped into 18 occupational families, which are used to classify agency positions into the appropriate jobs. Position-specific information is maintained at the agency level. Each occupational family has a separate job code catalog, which identifies broad, generic information about each classification that is used as reference documents for the job codes, job titles, job summaries, and entry qualifications and pay grades entered into the TeamWorks HCM system (also known as PeopleSoft). Additionally, the Compensation unit is responsible for assigning new positions to appropriate jobs within the classification plan and periodically assessing the classification of positions for consistency across agencies. The unit ensures that affected agencies of any requested changes of established criteria are first surveyed and notified of changes and that PeopleSoft and the job code catalogs are updated.

# Programs and Scope of Services (4)

## Faithful Service Award Program

The Compensation unit also manages the Faithful Service Award program, which the Georgia General Assembly established to help attract and retain employees by recognizing their service to the citizen of Georgia. Through this program, approximately 13,000 state employees are recognized annually, beginning with five years of total service and then every five years thereafter. Employees completing 10, 20, 25, 30, 35 and 40 years of service receive a service award certificate and lapel pin. Employees with 5, 15 and over 40 years of service receive an award certificate. The Compensation unit ensures that award certificates and pins are distributed each month to state employees through their agency's human resources offices. HRA works with Georgia Correction Industries (GCI) to process initial orders for the certificates and pins each month. GCI produces and sends the certificates and pins to the employing agency for distribution to the eligible employee. If a request for certificate reprints is received, HRA reprints the certificates and sends them to the employing agency. As part of the management of the program, the Compensation unit ensures that GCI has the necessary supplies each month for processing the requests, including certificate paper, certificate cardstock, and pins, and places orders with supply vendors as necessary.

## Georgia State Charitable Contributions Program

The Georgia State Charitable Contributions Program (GASCCP) also falls within the Compensation unit's responsibilities, with the compensation manager overseeing the program as of the 2<sup>nd</sup> quarter of 2021. The GASCCP culminates in a charitable giving two-month campaign each year in the Fall that allows the state of Georgia employees to make contributions to a charity of their choice from a list of vetted and approved independent charities and federations through reoccurring payroll deductions or one-time donations. More than 140,000 state and Board of Regent employees are eligible to participate. Each year the HRA team accepts electronic applications from individual charities and federations to participate in the program and vets each applicant against criteria for participation provided in O.C.G.A. § 45-20-50, et seq. Pursuant to state law, the SPB must approve the list each year. HRA approves the annual operating budget and administrative duties of the program and manages the third-party vendor (currently America's Charities) that is used to host the charitable giving platform through which an employee selects the contribution amount and the charity or federation to provide the contributions.

The BOR utilizes a separate platform for their employees to pledge. HRA supports the GASCCP coordinators that run the campaign for their agencies by providing training and tools to encourage employee participation and answering questions about how to participate. HRA also meets weekly/bi-weekly (depending on the program phase) with the vendor to ensure the award process for agencies that meet the campaign's winning criteria and coordinator recognition are completed (plaques, certificates, and letters), to ensure agency GASCCP coordinator information is up to date, to provide platform requirements (theme, campaign dates, other updates) and to complete other necessary administrative tasks including ensuring eligible employee HR/payroll (including PeopleSoft) census files are up to date and submitted timely to the vendor for employee setup purposes in the portal, the pledge files are provided back to the agencies for the payroll deductions, and review and approval of program materials. The vendor also provides reports, manages the monies collected, and distributes them according to a formula based on employee selections and program costs at the end of each quarter for the campaign.

# Programs and Scope of Services (5)

## Your Total Rewards

The Compensation unit also manages the Your Total Rewards program, as of January 1, 2021, which provides employee awareness about the total compensation and rewards they receive from a combination of direct compensation and the value of indirect compensation, which includes the state's benefits, retirement, work-life options, and development and career opportunities. The Your Total Rewards program is currently available to TeamWorks agencies only. The Your Total Rewards e-statement is accessible with the state's GaBreeze Benefit Center (which also houses the flexible benefits plan eligibility and enrollment platform and Retirement System of Georgia platform).

## **Benefits**

The Benefits unit administers various programs designed to recruit and retain employees to help create a total rewards package, including the Flexible Benefits Program, the Employee Assistance Program (EAP), the Employee Discount Program, and the Employee Purchasing Program.

## Flexible Benefits / Employee Benefit Plan Council

The Flexible Benefits Program, on behalf of the Employee Benefit Plan Council, offers fourteen (14) separate benefits to state employees, public schoolteachers, and public school system employees pursuant to O.C.G.A. § 45-18-50, et seq. The benefits offered include dental, vision, life insurance, short- and long-term disability, specified illness, long-term care, legal services, and flexible spending accounts. The Flexible Benefits team presents contract renewals, requests to release RFPs and award contracts, open enrollment statistics, and recommended plan changes to the Employee Benefit Plan Council for their consideration and review throughout the year. The Flexible Benefits unit utilizes a third-party enrollment and eligibility vendor to provide a platform ("GaBreeze") for eligible participants to enroll in benefits and modify benefit elections, including when qualifying events occur. Alight posts reports and file layouts for the reports on their employer website. The services provided by Alight include: administration of the eligibility rules; processing of enrollment events; reporting of enrollment and premium totals (transferring data / file interfaces between the state's PeopleSoft TeamWorks system for payroll deductions and other "manual" systems); provision of a Benefits Call Center for flexible benefits users; acts as the COBRA (Consolidated Omnibus Budget Reconciliation Act) administrator for the Flexible Benefits Program (handling the provision of applicable notices, eligibility, and direct billing for COBRA participants; initiates billing process for other direct bill participants such as those on protected leaves of absence; financial manager services reporting and support; provision of an employer website for online reporting tools; provision of Your Total Rewards information; emails or mails communications on behalf of HRA or the flexible benefits providers; assists with updating the flexible benefits plan documents; and maintains data relating to the program; and provides compliance and government reporting support including HIPAA. When a participant's appeal of an action relating to their flexible benefit participation cannot be handled by Alight, it is escalated to the HRA team, who have a formal appeal process to consider each circumstance and ensure consistency in results. The Flex team also works each open enrollment to ensure the contracts with the individual flexible benefits providers are renewed, and any changes to the services or fees associated are updated with Alight, and within the open enrollment materials, including the You Decide Guide, the website, and the benefits fairs (in-person/virtual). Furthermore, throughout the year, various updates or changes to the flexible benefits plan arise due to Federal law changes or relief (such as the COVID-related relief implemented under the CARES Act and the American Recovery Plan Act). The Flexible Benefits team also works with DOAS Legal to review and approve Power of Attorney requests for flexible benefit plan participants. Annual stewardship meetings are held with the flexible benefits vendors as part of the vendor management process.

# Programs and Scope of Services (6)

## Employee Assistance Program

The Benefits team also holds responsibility for managing the Employee Assistance Program, which provides professional, confidential support services and information for a variety of life areas, including family issues, workplace issues, stress management, parenting, anxiety, aging, relationships, grief, alcohol/drugs, depression, and abuse. The vendor KEPRO holds the current contract and provides a website through which employees may search for available services and make requests. Per State Personnel Board Rule 30, the program managed by HRA is optional for entities to participate in, with the cost being provided on a per-employee headcount basis with three different tier levels of services. The Flexible Benefits team manages the vendor's performance, including quarterly meetings to review aggregate utilization reports and serve as a conduit between the participating entities and the vendor. Each year in May, the Benefits team notifies the agencies about the annual contract renewal/join process for the upcoming fiscal year, beginning July 1, and responds to agency questions about the renewal process, which can be done anytime throughout the year. Most agencies renew effective July 1 each year.

## Employee Discount Program

The Benefits team reviews requests to offer state employees discounts and provides an application and policy to which the participating companies must adhere for participation. If a discount is approved to be offered, then information relating to that discount is hosted on the Team Georgia website's discount page.

## Employee Purchasing Program

Pursuant to O.C.G.A. §45-7-56, the Benefits unit has managed the Employee Purchasing Program, under which employees are provided the opportunity to purchase consumer products through payroll deductions. This program was established by a house bill during the 2015 legislative session. The Benefits unit manages the vendor, currently Purchasing Power, with annual meetings to review the usage of the program and to review requests by the vendor for modifications to the program. In addition, the Benefits team coordinates three annual marketing campaigns between Purchasing Power and Alight to produce and mail postcards/flyers to a subset of employees.

## Marketing/Communications

HRA uses MailChimp to send out mass emails to agencies for the various programs described above. HRA uses Oracle CRM to manage the email lists used for the emails. MailChimp provides metrics and handles the "unsubscribe" feature mass emails require. Each program works with HRA Marketing/Communication to update website content in ARC, DOAS, Team Georgia, and Team Georgia Careers. Each quarter HRA produces the HRA Horizons newsletter. Beginning in June 2021, a new quarterly newsletter, The Benefits Advantage, was published. Both newsletters are intended to provide guidance and raise awareness of HRA programs, compliance, and industry trends. In addition, HRA creates and distributes advisories as needed. In FY22, HRA will supplement the standard communication methods, like websites, emails, and community meetings with podcasts, and increase its social media presence through marketing campaigns.

# Employee Records Overview

## System-Wide

Employee records included here are non-separated employees from all entities currently using the TeamWorks HCM system as of Fiscal Year End (FYE) of June 30, 2023.

# Section Highlights

- System-Wide Employee Records increased compared to the prior fiscal year-end when looking at the Active, Full-Time, Non-Temporary, Primary Records component. That amount has generally been declining since its peak at FYE 2008.

System-Wide Item	FYE 2023	Change from FYE 2022	Change from Peak (FYE 2008)
Current Employee Records	70,114	-5.9%	-30.7%
Active, Full-Time, Non-Temporary, Primary Records	61,864	+3.5%	-25.8%

- The calculated turnover rate declined compared to recent years, which appears in other sections as well, but is at its lowest level since FY 2018.

# System-Wide Turnover Rates (Full-Time, Non-Temporary, Primary Records)

# Employee Records Overview

## Executive Branch

Employee records included here are non-separated employees from Executive Branch entities currently using the TeamWorks HCM system as of Fiscal Year End (FYE) on June 30, 2023.

The Executive Branch could include departments, agencies, boards, bureaus, commissions, offices, and authorities, and the Technical College system and its schools.

# Section Highlights

- Executive Branch Employee Records increased compared to the prior fiscal year-end when looking at the Active, Full-Time, Non-Temporary, Primary Records component. The contingent (remaining) records saw a decrease in part due to the end of active state service within the Department of Defense.

Executive Branch Item	FYE 2023	Change from FYE 2022
Current Employee Records	57,240	-6.4%
Active, Full-Time, Non-Temporary, Primary Records	49,926	+3.0%

- We are also continuing to see an increase in the proportion of the workforce that is composed of younger cohorts of Millennials and Generation Z. The increase from the end of Fiscal Year 2022 was 5.6 percentage points.

## Portion of Executive Branch Current Employee Records as Millennial and Generation Z

# Employee Records by Tenure (in years)

*Special thanks to the Employees Retirement System of Georgia (ERSGA) for their partnership to have the up-to-date retirement eligibility determinations summarized here.*

*For specific information about your entity please contact your assigned Workforce Planning Coordinator with ERSGA.*

# Retirement Eligibility

## Executive Branch

Included here are for Executive Branch entities using the TeamWorks HCM system during Fiscal Year 2023 (between July 1, 2022 and June 30, 2023).

The Executive Branch could include departments, agencies, boards, bureaus, commissions, offices, and authorities, and the Technical College system and its schools.

# Section Highlights

- The portion of current Executive Branch full-time, non-temporary, primary records eligible to retire early today is over 10%.

- The portion of current Executive Branch full-time, non-temporary, primary records eligible for full retirement within the next 5 years is back over 20%.

# Retirement Eligibility Proportions

# Hiring Events

## Executive Branch

Events included here are for Executive Branch entities using the TeamWorks HCM system during Fiscal Year 2023 (between July 1, 2022, and June 30, 2023).

The Executive Branch could include departments, agencies, boards, bureaus, commissions, offices, and authorities, and the Technical College system and its schools.

# Section Highlights

- Executive Branch Hiring Events are greater than in previous years, recording a second consecutive fiscal year of growth.

- We are also continuing to that the younger cohorts of Millennials and Generation Z compose some 65% of hiring events or more.

# Comparisons and Retention

## Executive Branch

Employee records included here are for Executive Branch entities using the TeamWorks HCM system through Fiscal Year End 2023 (June 30, 2023) and previous annual periods.

The Executive Branch could include departments, agencies, boards, bureaus, commissions, offices, and authorities, and the Technical College system and its schools.

# Section Highlights

- In addition to seeing hiring events increase and separation events decrease, they resulted in more hiring events than separation events for the first time in several years, which helped stabilize and grow the employee population.

- In recent years, we have seen a modest increase in the three-year retention reference, especially in the Executive Branch overall.

# Transfers and Broader Turnover

## Executive Branch

Events included here are for Executive Branch entities using the TeamWorks HCM system during Fiscal Year 2023 (between July 1, 2022, and June 30, 2023).

The Executive Branch could include departments, agencies, boards, bureaus, commissions, offices, and authorities, and the Technical College system and its schools.

# Section Highlights

- As we have seen for several years, younger cohorts exhibit a higher voluntary turnover rate (nearly twice as likely with each younger generation), indicating that continued recruitment cycles will be more likely in the future.

- Although still developing, of potential note is that the broader turnover rate (including intra-state transfers) declined to below FY 2021 levels.
