Office of Fleet Management (OFM) Programs

ARI Insights is the State of Georgia's central fleet repository that houses specific vehicle-related data pertaining to transactions and utilization. Information such as vehicle inventory, maintenance, repair, mileage and assignments are captured within ARI Insights. This enables fleet personnel to maximize how critical fleet assets are purchased, maintained and optimized throughout their useful life.

WEX Online is a solution for managing the state's fuel needs provided through WEX Inc. This tool allows fleet personnel to manage fuel expenditures, assign driver pin numbers, view invoices, run transaction detail reports, edit authorization profiles, issue or suspend fuel cards, etc.

WEX ClearView is an analytical tool that allows fleet personnel to view overall fuel spending, classify fraudulent activity, identify fuel consumption patterns, research anomalies, and view exceptions based on certain criteria. Additionally, ClearView lets you track fleet purchases by fuel type, gallons purchased, prices, and expenditures—so you can identify and prioritize key cost drivers, problems, and spending behaviors. ClearView produces compelling charts and graphs that make your data easy to understand.

DriverCheck manages the State of Georgia's Report My Driving Program, which permits citizens to call in and report the driving behavior of State of Georgia's drivers. Users for this program have access to maintain and update asset records, run reports, and access to Observation Reports.

Team Georgia Learning is the DOAS Learning Management System (LMS) which contains the educational courses, training and learning programs that the Office of Fleet Management provides to the Fleet Coordinators throughout the State. The application helps the Office of Fleet Management with the administration, delivery, tracking, documentation, and reporting of the Fleet Coordinators education record.

ClearView Snap pushes reports, via email, each month right to your inbox that provides dashboard-based views in the form of easy-to-interpret charts and graphs. These graphs and charts depict fuel expense insights that gives you a quick snapshot of your agency's fueling activity.
ClearView Snap dashboards include:
• Fuel consumption in gallons and dollars
• Mid- and premium-grade fuel purchasing
• fuel spend by product type and
• A list of your highest-spending drivers. Spreadsheets

The dashboard metrics are intended to provide Fleet Managers with a quick look into how they are performing relative to different metrics. These metrics have different times in which they are updated, so refer to the metric descriptions for time intervals. The Replacement Cycle Analysis and Underutilized Vehicle Analysis are tools Fleet Managers can use to help better manage the utilization and replacement of vehicles.
