The 10 Hour Construction Safety Outreach Training Program is intended to provide an entry level construction worker's general awareness on recognizing and preventing hazards on a construction site. OSHA recommends the Outreach Training Program courses as an orientation to occupational safety and health for workers covered by OSHA 29 CFR 1926. Workers must receive additional training, when required by OSHA standards, on the specific hazards of the job.

****Space is limited, so please confirm your reservation as soon as possible. Registration ends on Friday, April 8, 2011.****
